

Download Manager V0.9.0 Release Notes

New Features and Changes

- Order/product boundaries can be displayed on the new Map View in both Java 7 and 8.
- An option to enable/disable file size preloading has been added to the Options dialog.

See the user guide for more information on these new features and changes.

Bug Fixes

The following items have been fixed and are contained in this release.

- Download items that end up in an error status cannot be started over without reloading the item into the application.
- There is not a method to obtain the download link for an item.
